

Accomplishments

- Implemented responsive design
- Cleaned up/refactored code for handling record data
- Created mockups of submission form design

Next Week's Plans

- Implement the admin portal with basic styling
- Start on data visualization: integrate D3.js to show some basic charts on the archive

This Week's Plans

- Create the submission form and connect to database
- Start on admin approval mockups
- Convert deprecated Google Maps API module

Risks/Help Needed

- No risks

Accomplishments

- Created submission form and database setup for submitted records
- Designed admin portal mockups
- Added some responsive navbar interaction

Next Week's Plans

- Improve styling for newer features
- Add database functionality for admin portal

This Week's Plans

- Implement admin portal

Risks/Help Needed

- Need to refactor `source_type`, as records will only show when source is Yearbooks or Newspapers (won't work for crowd-sourced items)

Accomplishments

- Implemented Google Authentication for admin login
- Created barebones admin login
- Refactored ImageGallery component to be reusable

Next Week's Plans

- Tests/bug fixes to ensure consistency of data (all records show the minimum same information) and Image Gallery/Campus Map are compatible with submitted records

This Week's Plans

- Create admin functionality/management
- Continue styling

Risks/Help Needed

- Some further work needed with responsive layout

Accomplishments

- Implemented Accept/Deny functionality for submissions in admin portal
- Added status filters for admin portal

Next Week's Plans

- Continue improving ImageGallery and modal components

This Week's Plans

- Improve Node script for command-line uploads

Risks/Help Needed

- Load time for photos → change render to only fetching current page's records
